Profile

UI Engineer with 4+ years of experience building clean, user-centered interfaces and delivering production-ready design systems.

- Design intuitive, modern UIs in Figma with a strong emphasis on usability and consistency
- Build modular, scalable components optimized for seamless developer handoff
- Bridge the gap between design and development through clear specs and real-world feasibility
- Collaborate closely with frontend teams to ensure smooth design-to-code translation
- Apply strong HTML & CSS knowledge to support implementation and design validation
- Focus on functional design that balances aesthetics with performance and usability
- Advocate for structure, clarity, and maintainability in UI design systems

Professional Summary

UI/UX Designer and Frontend Developer,

Creative UI/UX Designer with 3.5+ years of experience crafting Figma designs and turning them into clean, scalable React/Next.js code.

- Design modern, user-focused interfaces in **Figma**
- Convert designs into **clean, component-based JSX code**
- Build **developer-ready UIs** optimized for logic integration
- Avoid basic HTML/CSS handoffs — deliver **real, production-level code**
- Create **modular React components** for easy functionality implementation
- Focus on **practical, intuitive design** — not just fancy visuals
- Ensure **clarity and structure** for seamless dev collaboration

Professional Experience

Byte Legion, UI/UX Designer

08/2025 – 11/2025
Islamabad, Pakistan

At Byte Legion, I worked as a UI/UX Designer responsible for creating clean, functional, and business-focused interfaces. I handled both full design projects from scratch and complex redesigns where the existing UX was weak or inconsistent.

- 1. Adonai Fitness Engineering (Triceps Rope) I designed the entire website from the ground up. I built the layout, structure, visual direction, and user flow from scratch because the brand had no existing design. The result was a professional, high-clarity landing experience that properly showcased the product and fixed the typical amateur fitness-site mistakes.
- Bar Bunny App (Redesign) I redesigned the app's UI and reorganized the core user flows. The original design was inconsistent, cluttered, and confusing. I fixed the hierarchy, cleaned up the component system, and made the navigation predictable and lightweight so users could actually get things done without friction.
- AISS Dashboard (Redesign) I redesigned their internal dashboard, which originally had poor structure and weak data visibility. I reshaped the information architecture, consolidated scattered UI patterns, and created a more logical layout that lets users understand data faster and perform tasks without guesswork.

Octech, UI Designer & Developer

Nov, 2024 – Jul, 2025
Great Poland Street,
London, England

Led UI design for client projects including E-Nomad and UAPAY, delivering responsive, user-centered interfaces aligned with brand goals and user needs.

- Translated design briefs and user requirements into clean, functional UI solutions
- Created design systems and reusable UI components in Figma for scalable consistency
- Designed interactive layouts with attention to hierarchy, clarity, and accessibility
- Collaborated closely with developers to ensure pixel-perfect implementation
- Contributed to UX planning and sprint design cycles, including a structured 2-week rollout of E-Nomad's full design system
- Integrated smooth, intuitive motion design using principles adapted from Framer Motion
- Designed dynamic, mobile-friendly components such as carousels, forms, and CTAs

Danze Tech, UI Developer & Designer

Dec, 2022 – Oct, 2024
Viby, Denmark

Designed and co-developed responsive, user-focused web applications by blending strong UI/UX principles with modern frontend practices.

- Converted Figma designs into pixel-perfect UIs using React.js, Next.js, Tailwind CSS, and traditional CSS
- Built reusable, accessible components optimized for performance and consistency
- Integrated smooth micro-interactions using ShadCN and Framer Motion
- Collaborated with developers and stakeholders to deliver cohesive, high-quality experiences
- Contributed to multiple client projects through agile sprints, design reviews, and cross-functional teamwork

Void Soft Technologies, Frontend Developer

08/2022 – 10/2022
Rahim Yar Khan, Pakistan

Built a strong foundation in frontend development and UI/UX design by creating user-friendly interfaces in Figma and implementing them with HTML, CSS, and basic JavaScript. Gained hands-on experience with responsive design, version control, and component-based UI development — sparking a deeper interest in React and Tailwind CSS.

Skills

Figma • Prototyping • Frontend UI • Tailwind CSS • React JS • HTML & CSS • Framer Motion • GSAP

Projects

Enomad, Your Global Growth, Secured and Streamlined.

05/2025 – 06/2025

Firm of international tax advisors, E-Nomad helps freelancers, entrepreneurs and independent contractors to minimize their tax rate by obtaining residency and setting companies in countries with a reasonable tax liability. E-Nomad looked to design and develop a recent and mobile-first web which could convert and could easily introduce the visitor proper value and services.

Octech, Innovate. Code. Scale.

12/2024 – 01/2025

Octech is a global digital services and outsourcing agency providing UI/UX design, web and product development, IT consulting, blockchain, and healthcare BPO (medical billing, transcriptions, management). With offices in the USA, Canada, UK, UAE, and Pakistan, Octech empowers businesses to scale via cost optimization, strategic outsourcing, and innovation-focused technology adoption.

Yaksport, Training camps for everyone!

07/2023 – 06/2024

Yak Sport is a Denmark-based travel agency specializing in organizing training camps and sports trips for clubs, associations, and schools. They send hundreds of athletes annually to destinations like Turkey, Spain, Greece, and Cyprus with a strong focus on transparent pricing, fast communication, and quality facilities. The company is a member of Rejsegarantifonden, ensuring travel protection .

UAPay, Fuel Growth With Effortless Payments

03/2025 – 04/2025

UAPAY is a leading Ukrainian fintech company, licensed by the National Bank of Ukraine as a payment institution since May 2023. They serve over 4.5 million users and process 450 million+ transactions worth 320 billion UAH, offering robust payment processing solutions, including card payments, QR codes, mass payouts, escrow services, and SDK/app integrations.

Aurix, Built a results-driven, AI-powered trading platform with seamless user onboarding

03/2025 – 04/2025

Aurix is a gold-only algorithmic copy trading platform delivering stable, hands-free growth with under 6% drawdown. I developed key frontend components including About, Benefits, How it Works, and Live Performance sections—ensuring a seamless experience and clear financial insights. Focused on fast-loading pages, live trading stats, and mobile responsiveness.

Tututor.ai, Innovate your teaching with AI tools for teachers.

10/2024 – Present

Tututor.ai  is a Spain-originated ed-tech platform designed “by teachers, for teachers.” It accelerates lesson planning and content generation by leveraging AI to automate up to **7 hours of weekly work**. It includes curriculum-aligned tools for the Spanish education system—such as learning unit outlines, assessment rubrics, diverse exam generators, chatbot support, image creation, storytelling, and gamification—while adapting for special-needs classrooms

Trust Flare, Start with Crypto Scale with Trust Flare

08/2024 – 09/2024

Trust Flare is your guiding light in the cryptocurrency and Web 3.0 realm, providing a platform for confident navigation of the decentralized world. Join the revolution and let Trust Flare illuminate your path!

Lonestar Global, Build Your Vision with Us

02/2025 – 03/2025

Lone Star Global is a Texas-based, veteran-owned services provider offering solar panel and battery installations (with “no money out of pocket”), alongside comprehensive roofing, patio, renovation, and real estate assistance across residential markets.
